# ACC AI Hacks Prompts

## Fair Use

Give me a quick legal history of fair use in the U.S.

What litigation strategies have companies like OpenAI, Meta, and Microsoft used in defense of IP infringement claims.

## NDA

[upload ACME NDA]
I'm corporate counsel for a SaaS company based in California. Enclosed is an NDA from a customer that I need to review. Is there anything in this agreement that is unusually, particularly restrictive, or that might create unnecessary hassle to comply?

I'm particulary concerned about sharing information with representatives or third parties, like our cloud vendors. What does the NDA stipulate there?

[update ContractSafe NDA]
Here is my company's standard NDA. Call out any differences between the two agreements.

## Judgment

[Upload TED Ruling]
Can you summarize this ruling?

Can you describe the background of the case?

I'm corporate counsel for TED. Please create an executive summary of the ruling, with some background, that would be suitable for an executive at my company who is not a legal expert.

## Data Analysis

[upload Contract csv]

Let's do some exploratory data analysis on this csv.

Let's analyze renewals.

I'm curious how many contracts are up for renewal this year and what the overall value of those contracts is.

Create a chart for the value of contracts renewing this year, in dollars, by Service Type.

Which account manager is managing the highest value of contracts overall?

Can you create a chart of contract value by account manager?

Create a visualization showing correlation between account manager and Service Type.
